

## Project Video Presentation Critique

### 1. The Assignment

We learn by analysing effective data visualisations that were done by others. We also apply what we have learnt when we give thoughtful comments on the visualisations that were done well and those implemented poorly as we suggest constructive alternatives that can make the visualisation and visual narrative more effective.

In Assignment #2, you will be given two randomly selected video presentations done by your classmates as part of Assignment #1. For each of the videos, you are to write a **separate critique report** discussing various aspects of the presentation that were **done well and/or done poorly**. One of your two submitted reports will be randomly chosen for assessment based on the criteria detailed in Appendix A. Be familiar with the criteria so that they are clearly addressed in each of your critique reports.

Whether you receive a video presentation that is done well or poorly, the stipulated assessment criteria provide ample opportunities to write a good critique report that can demonstrate your mastery of the contents covered in this course. Do note that comments that are made frivolously and not supported by clear explanation and rationale will receive no marks. Your goal is to ensure the contents of your critique reports show evidence that you have **understood the data visualisation topics and principles** covered in this course and you are able to apply them in an appropriate context.

### 2. Deliverables

You are required to submit two video presentation critique reports based on the following guidelines:

**Page limit** – Each of your critique reports **should not exceed 4 pages** (in softcopy PDF or Word format). Font sizes should be no smaller than **11 point**. This page limit **includes** your optional references and figures, which should be appropriately cited in your write up.

**Templates** – Use the two uploaded templates ("**Critique 1-Vnn.docx**" and "**Critique 2-Vnn.docx**") to complete your two critique reports, **one for each of the video** you have been assigned. The templates will guide you on the required information that you have to provide to address the stipulated assessment criteria.

**Note:** Replace **-Vnn** in the report filename with the video number associated with the reviewed video.

### 3. Submission Mode and Deadline

The table below outlines how and when assignment #2 is to be submitted. Your two assigned videos to be reviewed will be given to you at the **start of Week #12**.

| Deliverables                                                                                                                                                                                                                                                                                                                                                                                                                                    | Submission Mode                                            | Deadline                                          |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------|---------------------------------------------------|
| <b>Video Presentation Critique (Video #1)</b> – Completed critique report done using template ( <b>Critique 1-Vnn.docx</b> ). Note the following: <ol style="list-style-type: none"> <li>The video number (e.g. V07) of the video presentation being reviewed to be indicated in the filename.</li> <li><b>Do not indicate your name</b> anywhere in the report as it will be forwarded to the presenter as anonymous peer feedback.</li> </ol> | Upload to NTULearn as an Assignment ( <b>Critique #1</b> ) | Any time before Friday, <b>Week #13</b> (12 noon) |
| <b>Video Presentation Critique (Video #2)</b> – Completed critique report done using the provided template ( <b>Critique 2-Vnn.docx</b> ). Same instructions as in Critique #1.                                                                                                                                                                                                                                                                 | Upload to NTULearn as an Assignment ( <b>Critique #2</b> ) | Any time before Friday, <b>Week #13</b> (12 noon) |

### Appendix A – Assessment Criteria for Video Presentation Critique

| Video Presentation Critique - Assessment Criteria                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | Weightage |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|
| <p><b>Choice of visuals, visualisation techniques and appropriate use of human visual perception principles</b> – Critique the <b>choice of visuals</b> (i.e. plots and charts) used in the videos. Were they <b>appropriate and effective</b> for their intended purpose? Give examples of <b>what worked and what did not work</b> in the presentation, and your <b>reasons</b> for saying so. For those that worked, explain why they were appropriate and effective. For those that were not effective, <b>suggest alternative visuals</b> that would be more suitable and why these would be better. Critique the <b>visualisation techniques and designs</b> (e.g. correlation analysis, interactive visualisation, confirmatory analysis, geospatial visualisation, etc) that were used in the presentations. Were they appropriate, done correctly, effective? For those that worked, explain why they were effective. For those that were not effective, suggest alternatives that would be more suitable and why these would be better. In particular, you must comment on the appropriate use of the <b>human visual perception (HVP) principles</b> covered in the course that helped make the visualisation and visual storytelling more effective. If missing, where and what HVP principles could have been employed to enhance specific aspects of the visualisation. (Note: Give <b>video timestamp</b> of examples cited, e.g. as [2:34]).</p> | 85%       |
| <p><b>Overall Comments</b> – Comment on what you think is the <b>strongest feature</b> of the video presentation and what is its <b>weakest feature</b>. You must give appropriate elaborations for both these comments so that the rationale for your comments is clear and justifiable.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | 15%       |
| <b>Total</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | 100%      |
